FAQs

What if I hire a full time designer directly?

Good question! For starters, currently the salary for senior level graphic designers reaches IDR 300 million per year, plus benefits (insurance, allowances, etc.). Besides, you probably don't have enough work to keep them busy, so you're stuck paying for something you can't make the most of.

With a monthly subscription, you can cancel and continue your subscription whenever you want. With this option, you pay the designer only for what you need.

Is there a limit to how many designs I can request?

When you decide to subscribe, you can add as many design requests as you need (Standard and Pro plans) to Trello, and we will complete your design requests one by one.

How soon will I receive my design?

The average completion time for each design request takes 2 (two) working days. However, more complex design requests require more time.

Who are the designers?

You may be surprised to hear this, but Foxtrot Studio is (at least for now) a creative agency company consisting of only 1 (one) person. Which means, you partner directly with me, the Founder of Foxtrot Studio.

However, work that requires more creative energy such as animation and custom illustrations is provided by our other creative partners.

How does the pause feature work?

We understand you may not have design needs every month. For example, this month you only need 5 - 10 designs, this is where the cancel subscription feature comes into play.

The subscription billing period is 30 days. For example, you subscribe from the first month, then decide to stop subscribing the following month. You can resubscribe on any date in the following month, you can even resubscribe on D+1 since you canceled your subscription.

What program do you use?

For most design requests, we use Sketch or Figma.

How do I make a design request?

Foxtrot Studio gives you the freedom to make design requests. Generally an easier way is to use the Trello app, share files via Google Drive, or even record your request in video format (for those of you who don't really like writing).

Basically, any method that can be connected to Trello, it's a fair game.

What if I don't like the design?

Don't worry. We will make as many revisions as necessary until you are 100% satisfied with the results.

Is there any design work that can't be done?

Of course there is. Foxtrot Studio does not work on the following designs: 3D modeling, graphic animation (GIFs, etc. — both available in separate subscription packages), document design (medical forms, etc.), complex packaging, and complex printing designs (magazines, newspapers, etc.).

What is your refund policy?

Because it requires high quality design work, we do not provide refunds.
